Cyber Security Solutions

Empowering SMBs to achieve SMB1001 Gold and Diamond alignment

We don't worry about what keeps you up at night.

We worry about what ***should*** keep you up at night.

Introduction

Evolve Technologies is dedicated to helping small and medium businesses (SMBs) across Australia thrive in a rapidly evolving digital landscape. Our new cybersecurity solution options are designed with your business' unique needs in mind, enabling you on your pathway to achieve alignment with the SMB1001 Gold and Diamond standards with confidence. Backed by industry expertise, our tailored plans offer robust protection, compliance, and peace of mind - so you can focus on what matters most: growing your business.

Why Framework Alignment Matters

SMB1001 Gold and Diamond are leading cybersecurity frameworks that set the benchmark for best practices in protecting Australian businesses. Aligning with these frameworks not only helps safeguard sensitive data and operations but also demonstrates your commitment to cyber resilience to partners, clients, and insurers.

- Boosts Trust: Clients and partners are reassured by your proactive approach to security.
- Meets Legal Requirements: Ensures compliance with regulatory standards and industry expectations.
- Reduces Risk: Minimises the likelihood of costly breaches and downtime.
- Unlocks Insurance Savings: Aligned businesses often qualify for reduced cyber insurance premiums.

Plan Overview

Choose between two comprehensive cyber security packages tailored for SMBs seeking Gold or Diamond alignment:

- Option 1: Gold Alignment – Foundational protection with advanced tools, perfect for businesses starting their cyber security journey.
- Option 2: Diamond Alignment – Enhanced coverage including penetration testing and external MDR integrations for businesses requiring the highest standard.

Comparison Table: Gold vs Diamond Alignment Plans*

Feature	Option 1: Gold	Option 2: Diamond
MDR Endpoint Protection	✓	✓
M365 Defender Suite (Business Premium)	✓	✓
Cloud/SaaS Detection & Response Platform	✓	✓
DMARC Protection (All Company Domains)	✓	✓
Password Management	✓	✓
Vulnerability Scans (All External IPs)	✓	✓
Advanced Vulnerability Scans (External & Internal)	–	✓
Penetration Testing	–	✓
External MDR Integrations (e.g. Cisco Duo, UniFi, Veeam, FortiGate, Mimecast, AWS)	Duo Only	✓ (2 included)

*both plans require Microsoft 365 Business Premium and 365 backups which are already offered in our standard MSP plans.

All plans include all service and subscription fees for cybersecurity work.

Bronze and Silver plans can be achieved with our standard MSP Service offerings. Gold and above require our cybersecurity offerings to further secure your business against modern day threats.

Why Each Inclusion Matters for SMBs

- MDR Endpoint Protection: Stops threats before they cause harm, protecting devices your team relies on every day. MDR is backed by a 24/7 team that is always looking at your threat status and reacting when you're asleep or away.
- M365 Defender Suite: Defends your email, apps, and cloud data from phishing and ransomware attacks, ensuring business continuity.
- Cloud/SaaS Detection & Response: Monitors cloud applications for suspicious activity, securing critical business data wherever it lives.
- DMARC Protection: Prevents email spoofing and phishing by authenticating company emails, safeguarding your reputation.
- Password Management: Encourages strong, unique passwords across your organisation, reducing the risk of breaches from compromised credentials.
- Vulnerability Scans (External): Regularly checks your digital perimeter for weaknesses hackers might exploit, allowing for quick remediation.
- Advanced Vulnerability Scans (External & Internal): (Diamond only) Identifies risks inside your network as well as outside, ensuring complete coverage.
- Penetration Testing: (Diamond only) Simulates real-world attacks to uncover hidden vulnerabilities before criminals do.
- External MDR Integrations: (Diamond only) Extends monitoring to leading third-party platforms, ensuring seamless protection for your full IT stack. Enable integration across your other 3rd party security solutions enables a complete protection approach.

Cyber Insurance Savings

Aligning your business with SMB1001 Gold or Diamond frameworks and implementing advanced security measures can lower your risk profile, making you eligible for reduced cyber insurance premiums. Insurers reward businesses that demonstrate robust protection and compliance, translating to real savings and added confidence.
